

RECEIVED

BEFORE THE ARKANSAS SECURITIES COMMISSIONER 19 MAR 26 AM 9:15

IN THE MATTER OF:
HOT COE COE LLC A/K/A
DICLOPS.COM

ARKANSAS SECURITIES DEPT.
CASE NO S-19-0029

REQUEST FOR CEASE AND DESIST ORDER

The Staff of the Arkansas Securities Department (“Staff”) received information and has in its possession certain evidence that indicates Hot Coe Coe LLC also known as Diclops.com (“Diclops”) has violated provisions of the Arkansas Securities Act (“Act”), Ark. Code Ann. § 23-42-101 through § 23-42-509.

Administrative Authority

1. This matter is brought in connection with violations of sections of the Act and is therefore properly before the Arkansas Securities Commissioner (“Commissioner”) in accordance with Ark. Code Ann. § 23-42-209.

Respondent

2. Diclops is an Arkansas corporation. Diclops lists its principle place of business on its filing with the Arkansas Secretary of State’s office as 701 South Street, Suite 100, Mountain Home, Arkansas. Diclops’ information page from the Arkansas Secretary of State’s website is attached hereto as “Exhibit 1”. Diclops’ address listed with the Arkansas Secretary of State is also the same address listed on the Diclops website “Contact Us” page. Diclops is not registered with the Arkansas Securities Department (“Department”) in any capacity.

Facts Supporting Cease and Desist Order

3. Diclops maintains a website with the web address of www.diclops.com. On the Home page of said website, which is attached hereto as “Exhibit 2”, it discusses in detail investing

in Diclops. On said home page under the Investors section, it repeatedly states that an investment in Diclops will produce a rate of return of up to 2,500% in 1-2 years. In this same section it also states, “We have another business plan to monopolize another particular sector, the food industry. We will probably go public with that company and we will keep you in mind when we do do an IPO (offer on the NYSE).” In addition, this section of the Diclops website discusses sending potential investors a promissory note either before or after the investor sends money to Diclops. Finally, under the proposal section of said website it states, “If you are an accredited investor that would like to invest in our business ... and possibly make 10,000% or more gains ... please contact us.”

4. Diclops makes repeated omissions and misstatements or misrepresentations of material information about the securities it offers for sale to Arkansas residents. The website mentioned in paragraph three fails or omits to provide any details about how Diclops’ business will be structured, managed or operated. In addition, the website fails or omits to state any information concerning how Diclops will expand its business to create or generate the revenue necessary to pay the extraordinarily high rates of return or gains listed in paragraph three.

5. While the Diclops website does discuss the risk that Diclops could fail completely and investors could lose some or all of their investment, Diclops fails to discuss all of the risks involved in investing in Diclops. Diclops fails to discuss risks, such as mismanagement, conflicts of interest or fraud risks, in its discussion of the Diclops investment risks. In addition, near the end of the discussion of risk on the Diclops website it states that, “...We have calculated the risk and think we can pull this off and make everyone a lot of money. We hope you trust us and we hope you join us in this risk/reward venture.” Diclops fails or omits to include any details or information concerning any risk calculations that it may or may not have completed.

6. On the Facebook home page for Diclops it states, "We are a weather control company who is currently raising money. We hope to make millions off of it and reward those who gamble on our offer." Later on the same page it states, "...We are a new fledgling company and trying to raise money. Please see site for details and investment opportunity." Said page is attached hereto as "Exhibit 3". The Facebook pages for Diclops fail or omit to discuss any specifics of its business plan/operation or any of the risks involved in investing in Diclops.

7. Diclops took out print advertising concerning investing in securities issued by Diclops in the newspaper publications the Big Nickle and the Treasure Hunt. These advertisements are attached hereto as "Exhibit 4". All of said advertisements mention an investment opportunity offering a 2,500% gain in 1-2 years. The advertisements also list the website www.diclops.com. In these print advertisements, Diclops fails or omits to discuss any specifics of its business plan/operation or any of the risks involved in investing in Diclops.

8. As detailed in paragraphs three and eight, Diclops stated that the investors could expect returns on investment or gains in the unreasonable high amount of up to 2,500% in 1 to 2 years. Also, accredited investors are promised a rate of return or gain of 10,000%. In addition, Diclops provides no detailed information or justification for these excessively high rates of return or gains on the website or the print advertisements. By omitting this essential or material information, an investor cannot properly and accurately assess the validity of the excessively high rates of return or gains listed by Diclops. These excessively high rates of return or gain are especially troubling in view of the lack of adequate risk disclosure by Diclops.

9. Diclops did not register or obtain any exemption from registration from the Department or the United States Securities and Exchange Commission for any of the securities it offered for sale to residents of the State of Arkansas.

10. Diclops did not file any paperwork necessary for any of the securities it offers for sale to be recognized as covered securities under any federal securities statute or the Act.

Applicable Law

11. Ark. Code Ann. § 23-42-102(17)(A)(i) defines a note as a security.

12. Ark. Code Ann. § 23-42-501 states it is unlawful for any person to offer or sell any security in this state unless: (1) it is registered under this chapter; (2) the security or transaction is exempted under Ark. Code Ann. § 23-42-503 or Ark. Code Ann. § 23-42-504; or (3) it is a covered security.

13. Ark. Code Ann. § 23-42-507(2) states that it is unlawful for any person, in connection with the sale of any security, directly or indirectly, to make any untrue statement of a material fact or omit to state a material fact necessary in order to make the statement made, in the light of the circumstances under which it was made, not misleading.

14. Ark. Code Ann. § 23-42-209(a) states that whenever it appears to the Commissioner, upon sufficient grounds or evidence satisfactory to the Commissioner, that any person has engaged or is about to engage in any act or practice constituting a violation of any provision of the Act or any rule or order under the Act, the Commissioner may summarily order the person to cease and desist from the act or practice.

Conclusions of Law

15. The promissory notes issued by Diclops and offered for sale by Diclops to the public were securities as defined by Ark. Code Ann. § 23-42-102(17)(A)(i).

16. Diclops did not properly register any securities, file for any exemption, or make any notice filing concerning any covered security with the Department regarding the securities offered for sale to the public.

17. The offer of unregistered and non-exempt securities by Diclops to public constitutes a violation of Ark. Code Ann. § 23-42-501 by Diclops.

18. Diclops violated Ark. Code Ann. § 23-42-507(2) when it omitted to provide material facts or information to potential investors, as detailed in paragraphs number 3 through 8.

19. The failure of Diclops to make full and complete disclosure of all the risks involved in the securities offered for sale by Diclops to potential investors, as detailed in paragraphs number 5 through 7, were omissions of a material facts or information in violation of Ark. Code Ann. § 23-42-507(2).

20. The conduct, acts, and practices of Diclops threaten immediate and irreparable public harm. A cease and desist order is in the public interest and is appropriate pursuant to Ark. Code Ann. § 23-42-209(a).

Prayer for Relief

WHEREFORE, the Staff respectfully requests that the Commissioner order Diclops to immediately CEASE AND DESIST from offering and/or selling any securities in or from Arkansas until the securities are properly registered or exempted from registration pursuant to the Act and Rules; offering or selling securities through the use of misstatements or omissions of material information; and, for all other relief to which the Staff may be entitled.

Respectfully submitted,

Scott Freydl
Staff Attorney
Arkansas Securities Department

ABOUT

Grow Towards The Rain

Choose to invest in a company whose founder has over 8 years of experience under their belt in weather control and Take the Lead(SM). Investor inquiries welcome. See Investor section and Proposal section.

Please read the whole site or at least until the music section.
Btw, we got our first public comment on an ad we ran on Facebook. It said, "The only thing you got right is spelling of your name. Dicklips." We thought that was funny and we'd share it!!!

INVESTORS

Share this with friends, family, co-workers, etc.

Diclops.com is looking for investors to invest in the company by loaning us money so we can implement the plan below. We are looking to raise between \$50,000-\$100,000 or more (preferably \$100,000-\$500,000 or more).

We are accepting micro loans as low as \$25 and \$100 which pay out up to a respective \$625 and \$2,500 in 1-2 years which offers up to a 25:1 ROI or a 2500% gain*!!!!

For every \$1,000 you loan to us to put into the project below now, we are offering up to \$25,000 back in 1-2 years. That is also up to a 25:1 ROI or a 2500% gain*!!!!

For investors who have a little more to loan us than the rest of the normal general population, think about what a \$10,000 or more investment as a loan would turn into should we be successful. Up to a cool \$250,000+, but you already knew that didn't you?

Wouldn't it be sweet to get up to a \$625 or \$2,500 or more check in the mail in a year or two on a \$25 or \$100+ investment you totally forgot about? It would be like winning the lottery that day and you could brag about how lucky you are, but wished you had gambled a little more. You know how it is.

We encourage you to loan us money and invest in this risky venture because experts say that younger people should invest 80% of their portfolio in high risk/high reward investments, and older people should invest 20% of their portfolio in the same thing. Of course you should not invest more than you are willing to/can afford to lose without affecting your life (you need to be able to pay your bills, buy food/gas/etc. and maintain balance in your 401k should it fail, etc). We think that if you can afford or save at least \$25, \$100 or a little more to invest, it would be worth the risk because again, the payout is awesome up to \$625 and \$2,500+ respectively*.

What we want to ask you is, "Are you a gambler and/or an investment risk taker?" and "Can you afford to loan and risk \$25-\$100 or more and be

ok if you lost it all?". We ask that because of the warning below about spending all your money implementing the plan without success and of the great reward that comes with our success should we be successful in implementing the plan. If you can't afford to lose it all, don't invest by loaning us money.

Think about it, even if we raise the higher total of \$100,000-\$500,000+ and are successful, we're only going to pay out \$2.5-\$12.5 million, which even if we raised \$500,000, would leave us with a profit of at least \$X amount, so it's a win win for all involved should we be successful.

We actually think we can implement the plan below with as little as \$25,000 and make a little more profit than if \$100,000-\$500,000 or more was brought in by investors, but a cushion would be nice. The higher amount would be a buffer which would allow us to hire more help to go faster and get your investment back quicker. We think giving a little more away and helping more people out is better anyway.

The risk to reward is so high because of the below factors. We could fail completely and go bankrupt (or have to raise more capital) by spending all the money you loan us to implement the plan and you may not receive anything back for your investment because: 1) people are outright skeptical and most in non-belief and/or are ignorant that anybody can change/control the weather (and that it is going on as you read this) and 2) people in the target areas may not cooperate (buy into the plan) without a demonstration because of the same factors in 1). We will not do a demonstration because without secure places (places we own and control everything of with tall walls around or in remote areas) to do it at, we risk losing the secrecy of our techniques.

We can't assure you we will be successful because of the factors as stated above, but we believe this is a zillion times more of a sure thing than buying random tickets to play the lottery blindly like a fool. We don't play the lotto because the odds are stacked against us, but we have invested quite a bit to get this going.

We are calculated and we have calculated the risk and think we can pull this off and make everyone involved a lot of money. We hope you trust us and we hope you join us in this risk/reward venture. Should we pull this off in one or more areas and make it this way, we plan on reinvesting it. We have another business plan to monopolize another particular sector, the food industry. We will probably go public with that company and we will keep you in mind when we do an IPO (offer stock on the NYSE).

Use the Paypal button to loan us money. The payment will go to the account The Nobody and

payment will go to the account the money and show up on your account or statement as such.

We will send you a promissory note to your email you provide with Paypal and your mailing address. We also need your phone number/address so we can confirm and send a check to your address when we can pay out on the loans. If you wish for a promissory note before you loan us money (which would be the smart thing for you), we can do that too, just contact us by using the contact form, email address, or phone number below and ask about a promissory note.

We have an Arkansas bank account you can wire money to if you are not comfortable with Paypal.

The bank has said they can probably keep both accounts numbers (the sender and us) anonymous from each other, so you can be assured of your privacy should you choose to loan us money this way.

We also have a mailing address where you can send a check or money order to. Do not use the address below to send mail to. Mail delivered to that address may or may not get delivered correctly as the mailbox here is not secure. Mail has been taken out of the mailbox before by the neighborhood hoodlums. Please email us for a secure mailing address.

If you plan on loaning us money by either of the above methods (wire or mail) besides Paypal, please send us a message either thru our contact page, to the email listed below, or to the phone number below, with your email address (and preferably phone number also) so we can contact you as soon as possible and give you the information for your new and exciting investment.

Please feel free to ask and direct any financial or other questions to the contact page, email address below, or call/text us on the number below for your questions. We will be more than happy to answer them if we can.

If you have issues like the Paypal button is not working or other issues with the site, please contact us immediately (preferably by email) so we can have it fixed by our site administrator.

"We are not planning on paying out more than \$12.5 million on the loans. Should we raise more than \$500,000, we will adjust the percentage paid out accordingly. Say we are loaned \$1 million (which would be great for us; we will cut the fundraising off at that amount), we will pay only 1250% on the loans. This will be explained in the promissory agreement we will send you.

Still, a \$25 loan would pay out \$312.50, a \$100 loan would pay out \$1,250, a \$250 loan would pay out \$3,125, a \$500 loan would pay out

\$6,250, a \$1,000 loan would pay out \$12,500, and a \$10,000 loan would pay out \$125,000, etc. should we be successful in implementing our plan and we raise \$1 million. Where can you get that type of payout playing the lotto?

THE PROPOSAL

You might have read this far and say it's a booby trap, but if you did, we would reverse it on you and say it's actually a party boob and you can suck on it like a group of infants on a professional wet nurse. LOL! See what we did there? (actually a person named Trigun Bebop thought that up (the booby trap, party boob idea) and +1'd us after we thought up dial us to get laid) It's pretty cool, booby trap, party boob, reverse, plus there's some truth to it if you think about it hard enough, lol, we said hard....anyways....if you don't get it, you're dumb; or maybe we're just dyslexic and weirdos....we like being weird sometimes....however....this is not the time nor place to be/get weird, so read on, here's the plan...seriously....

Please note: All figures below and one above have been replaced with an X.

Diclops is offering to show a certain number of trainees Diclops's trade secrets in weather control in selected areas (multiple areas, each the size of Texas or California or Montana or so) forever; for a price of course.

Diclops is asking for a certain amount (between \$X-\$X amount) to show the selected trainees how to control the weather in each selected area (when it is needed only). It is a value price for never seeing drought ever again in the areas and probably much less than what people/entities in the areas have spent on drought the past several years/decades/etc.

The plan is way more extensive than this (4 pages long), however we consider our plan proprietary and confidential.

If you are an accredited investor that would like to invest in our business instead of loaning us money and possibly make 10,000% or more gains (could also lose it all) please contact us. We will require documentation that you are accredited investor before we will deal with you and you will be required to sign several confidentiality, non-disclosure, etc. documents/agreements, and even then, we may not share the whole plan.

To find out if you are an accredited investor, please read
<https://www.investopedia.com/terms/a/accreditedinvestor.asp>

THOUGHTS

What we think

Diclops has the good stuff we only share with the trainees of the companies we are members of. We have over 100 ways of controlling the weather.

Diclops.com headquarters is located in Mountain Home, Arkansas, USA, home of the Bombers and the Trailblazers. We service the USA as well as the rest of the world and will service the entire solar system once feasible space travel is available to other planets/the sun. Our founder has been in private and purposeful weather control privately for 8 years now although weather control has been a part of their lives since the early 90's.

Diclops's founder decided to do something about drought and "rent" the methods thru a company. The methods our founder has come up with and the company will show the trainees (managers) are far superior to known methods. They have been tested against known weather control methods which pale in comparison in many areas.

Here are a couple of links to what we call "frauds of weather control" that make real weather control service companies like us look bad, however there are many other "frauds". We think they are no more effective than a rain dance (click the sites after you are thru reading diclops.com at your own peril (they are unsecure)):

www.weathermodification.com/

www.rainonrequest.com/

Disclaimer: The above are just examples. We can't actually outright call them outright frauds because we have tested each of the methods less than 10 times each, and scientifically, a sample of 30 or more is needed for statistical analysis. They may work a little, but we have experimented with them in our own way (see below) and it's actually unknown if they work or not. Most scientific papers say it is actually unknown if they affect the weather even though some papers are skewed towards positive results.

We haven't actually used silver iodide flown thru clouds in airplanes, but have used cheap clones of it using different dispersal methods, and it made it rain and snow a little initially (got 5-7 inches of snow in a narrow band in Kentucky by dispersing a certain substance from southern Illinois); however, after traveling and dispersing across several states with mixed results, we stopped using it and the drought of 2012 in the Midwest started, so we suspect using silver iodide is like the dragon chasing it's tail or a drug addict that needs more drugs constantly so we condone the use of it. We think it's dumb and won't dare use it again unless that (dry conditions) is what the people want. Here's a couple of examples of keeping rain away using silver iodide: China used quite a bit of it to KEEP IT FROM raining during the Olympic games in Beijing in 2008 and some companies use it to promise a rain free day for a high price such as \$150,000+ per day.

The ionization companies are also dumb if you ask us even though the next statement

the ionization companies are also dumb if you ask us even though the next statement gives them some credibility. Why doesn't electric power lines work? Or do they? We have found papers that support some evidence that since the above ground power line system was implemented, rainfall has increased by 20-30% in areas it has been installed. We have tried our own electric ionization systems based off of known USPTO patents and they didn't do anything for us: maybe because THEY WERE NOT BIG ENOUGH, or maybe our build was off, we don't know because they (most ionization weather influencing companies) keep proprietary info like we do and our system most likely was not built or worked like theirs.
